

# Project Alpha: Digital Transformation Solution

## 1. Executive Summary

This proposal outlines a comprehensive digital transformation solution designed to enhance Spark AI's operational efficiency and customer engagement. Our proposed system integrates advanced analytics, a new CRM platform, and a streamlined customer portal. We are confident this solution will drive significant improvements in data-driven decision-making and overall user experience, positioning Spark AI for sustained growth in a competitive market.

## 2. Key Requirements & Ask

- **Integrated CRM System:** Implementation of a new cloud-based CRM to centralize customer data and interactions.
- **Customer Self-Service Portal:** Development of a user-friendly online portal for clients to manage their accounts, access services, and submit inquiries.
- **Advanced Analytics Dashboard:** Creation of a real-time analytics dashboard to provide actionable insights into sales, marketing, and operational performance.
- **Data Migration & Integration:** Secure migration of existing legacy data into the new CRM and integration with current systems.
- **Training & Support:** Comprehensive training for staff on new platforms and ongoing technical support for 12 months post-deployment.
- **Project Timeline:** Completion of all phases within 8 months from project initiation.

## 3. Pricing Overview
